FIG. 1

(57) Abstract: A system receives location information (150) from a user, retrieves weather information based on the received location information, retrieves calendar information (170) associated with the user, and associates the weather information (160) with the calendar information in a calendar application (140).

# INTERNATIONAL SEARCH REPORT

International application No  
PCT/IB2007/053273

**A. CLASSIFICATION OF SUBJECT MATTER**  
INV. H04L29/08

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
H04L G06Q G01W G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, INSPEC, COMPENDEX

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	EUSTICE K F ET AL: "A universal information appliance" IBM SYSTEMS JOURNAL, IBM CORP. ARMONK, NEW YORK, US, vol. 38, no. 4, 1999, pages 575-601, XP002157988 ISSN: 0018-8670	1-7,21, 25,29
Y	page 581, left-hand column, paragraph 2	8-11,22, 26,30
A	page 587, left-hand column, paragraph 2 - page 589, left-hand column, paragraph 2 page 592, left-hand column, paragraph 3  ----- -/--	12

Further documents are listed in the continuation of Box C.

See patent family annex.

\* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*Z\* document member of the same patent family

Date of the actual completion of the international search

22 January 2009

Date of mailing of the international search report

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/IB2007/053273

## Box No. II Observations where certain claims were found unsearchable (Continuation of Item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3.  Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1.  As all required additional search fees were timely paid by the applicant, this international search report covers allsearchable claims.
2.  As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.
3.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4.  No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

### Remark on Protest

- The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- No protest accompanied the payment of additional search fees.

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-7,21,25,29

The first group of claims (claims 1-7,21,25,29) is directed to a calendar application, which associates weather information based on location information received from a user with a calendar information. This is done by retrieving weather information based on location information received from a user, then retrieving calendar information associated with the user, and then associating the weather information with said calendar information.

---

2. claims: 8-12,22,26,30

The second group of claims is directed to a calendar application, which generates a time elapsed weather video or animation based on retrieved weather information. This is done by first receiving a time period and location information in a calendar based application, then retrieving weather information based on said received time period and location information, and then generating a time elapsed weather video or animation based thereon.

---

3. claims: 13-20,23,24,27,28,31,32

The third group of claims is directed to a calendar application, which receives a weather based search query and generates/recommends ranked calendar dates based on a degree of match between the obtained weather information and the search query. This is done by receiving a weather based search query, then identifying calendar dates and weather information related to said search query, then ranking the calendar dates based on a degree of match between the identified weather information and the search query, then sorting the ranked dates, and then generating a report or making recommendation based on the sorted dates.

---
