Postfach 6940
8023 Zürich (CH)

(71) Applicant: **TOKYO KIKAI SEISAKUSHO LTD.**
Tokyo (JP)

(54) **Printed matter transport device**

(57) In a printed matter transport device wherein a printed matter is gripped by a gripping mechanism of a chain and made to travel along a guide rail, to improve the durability of the guide rail and chain, to prevent misalignment, falling out and damage when an external force acts on the printed matter, to improve durability of a connecting part of a chain link (2) (base) and the gripping mechanism, to reduce manufacturing costs, and to enable the printed matter to be firmly gripped. A chain with grips comprising first rollers (23) respectively arranged on two sides in the center of the longitudinal direction of the bases (21), a second roller (24) on one side perpendicular to the common center line of the first rollers (23) and a grip mechanism (20) on the opposite side, a guide rail, a chain drive means and a cam member are provided.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 81 0105

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
