Patented Feb. 3, 1925. 1,524,802

UNITED STATES PATENT OFFICE.

MABEL H. SLATER, OF NEW YORK, N. Y.

ATOMIZER DOLL.

Application filed May 1, 1924. Serial No. 710,314.

To all whom it may concern:

Be it known that I, MABEL H. SLATER, a citizen of the United States, residing at New York in the county of New York and State of New York, have invented new and useful Improvements in Atomizer Dolls, of which the following is a specification.

This invention relates to an improved doll, the object of the invention being to provide a doll which can be manipulated to eject a spray of perfume or the like through the mouth, nose, eyes, or any opening in the head of the doll. The mechanism or means for producing this effect being hidden in the head and body of the doll and in a hat on the doll's head.

The invention consists in a doll of the character set forth, and particularly of the construction and combination of parts set forth in the following specification and particularly pointed out in the claims.

Referring to the figure of the drawings, 5 is the doll's head; 6 the shoulder portions thereof, and 7 the mouth. 8 is a dress indicated in dotted lines and 9 is a hat. An air bellows 10 is enclosed in the hat 9 and is fastened to the head 5. A tube 11 leads from the air outlet of the bellows to the air tube 12 of an atomizer 13.

The atomizer is of usual construction consisting of a bottle 14 and adapted to contain liquid such as perfume, and a tube 15 leading from a point adjacent the bottom of the bottle 14 through a stopper 16 and terminating adjacent the inner end of the tube 12. A tube 17 leads out of the atomizer stopper and tube support 16 to the mouth 7.

The operation of the device is as follows:—When it is desired to eject a spray of perfume from the mouth of the doll, pressure is applied to the top of the hat 9, which compresses the bellows 10 and forces air through the tube 11 and across the upper end of the tube 15, thus drawing perfume from the bottle 14 and forcing it through the outlet tube 17 and through the mouth 7 in the form of a spray.

I claim:

1. A doll having, in combination, a head, a collapsible hat thereon, a bellows in said hat and an atomizer connected to said bellows and arranged to discharge vapor through an opening in the head.

2. A doll having, in combination, a head, a hat thereon, a bellows in said hat, an atomizer in said doll, and a tube connected to said atomizer and bellows, said atomizer being arranged within said doll with its discharge orifice adjacent to an opening in the head of said doll, whereby a spray of perfume or the like may be ejected through said opening.

In testimony whereof I have hereunto set my hand.

MABEL H. SLATER.
