A system for directing behavior of a first patient of a plurality of patients towards a behavioral objective includes a patient behavioral path calculator, a patient goal calculator, and a patient monitoring processor. The system also includes an information communication processor and a statistical processor. The patient behavioral path calculator calculates a patient behavioral path based on a statistical profile. The patient goal calculator calculates patient goals along the patient behavioral path toward a behavioral objective. The statistical processor can modify the statistical profile based on a response to a targeted message sent by the information communication processor.
