(54) Title: COVER AND ACTUATION ELEMENT AND COVER PLATE FOR WALL-MOUNTING OF MODULAR ELECTRIC APPARATUSES

FIG. 16

(57) Abstract: A cover and actuation element (10) of a wall-installable modular electrical apparatus (3), comprising: a plate-shaped body (200); coupling elements (230) fixed to the plate-shaped body (200), suitable and configured for mechanically coupling the cover and actuation element (10) to a cover plate (1) for modular electrical apparatuses (3) comprising a base body (100), wherein the coupling elements allow the plate-shaped body (200) to be constrained to the base body (100) so that said plate-shaped body (200) can move with respect to the base body (100) between two opposite stroke end positions, in one of which the plate-shaped body (200) is relatively closer to the base body (100) and in the other of which the plate-shaped body (200) is relatively further away from the base body (100); at least one pressure transmission member (250) operatively coupled to the plate-shaped body (200) to transmit a pressure force applied to the plate-shaped body (200) to the modular electrical apparatus (3).

**A. CLASSIFICATION OF SUBJECT MATTER**  
INV. H02G3/14  
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)  
H02G

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPO-Internal, WPI Data

\* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance  
"E" earlier application or patent but published on or after the international filing date  
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)  
"O" document referring to an oral disclosure, use, exhibition or other means  
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
