A METHOD AND SYSTEM FOR IDENTIFYING A USER ACROSS MULTIPLE COMMUNICATION DEVICES

The present disclosure provides a method and system for determining an exposure of media content. The method includes identifying a first plurality of communication devices, enabling broadcasting the media content embedded with an audio data stream for each of the first plurality of communication devices, receiving a unique deciphered identification information and a communication device identification information from each of a second plurality of communication devices and determining the exposure for the media content based on a pre-defined criteria. Each of the first plurality of communication devices are identified via corresponding communication device identifier information. The audio data stream includes unique audio identification information for each of the first plurality of communication devices. Each of the second plurality of communication devices deciphers the unique audio identification information from the media content broadcasted on the first plurality of communication devices.

INTERNATIONAL SEARCH REPORT

PCT/IN2015/050060

A. CLASSIFICATION OF SUBJECT MATTER
G06Q 3/02, G06F17/30 Version=2 016.01

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

G06Q, G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

Databases: PatSeer, IPO Internal
Search Terms: Online Advertisement, Communication device

C. DOCUMENTS CONSIDERED TO BE RELEVANT

☐ Further documents are listed in the continuation of Box C. ☒ See patent family annex.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent published on or after the international filing date
  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to an oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

Date of the actual completion of the international search: 31-12-2015
Date of mailing of the international search report: 31-12-2015
