(54) Title: SYSTEM AND METHOD OF DELIVERING CALLS

(57) Abstract: The present disclosure is directed to a system and method of delivering calls. In a particular embodiment, the method includes receiving a call at a server within an Internet Protocol Television (IPTV) system, where the call is directed to a user premise. The method also includes determining a presence of a user at a set-top box device at the user premise and determining a speed select function associated with the user. The method also includes selectively delivering the call to a communication device in proximity to the set-top box device via a private access network of the IPTV system, based on the speed select function.

</table>

* Special categories of cited documents:
   "A" document defining the general state of the art which is not considered to be of particular relevance
   "E" earlier application or patent but published on or after the international filing date
   "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
   "O" document referring to an oral disclosure, use, exhibition or other means
   "P" document published prior to the international filing date but later than the priority date claimed
   "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
   "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
   "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
   "&" document member of the same patent family
