Title: ACCESS, IDENTITY, AND TICKETING SYSTEM FOR PROVIDING MULTIPLE ACCESS METHODS FOR SMART DEVICES

Abstract: A system and method for storing and reading digital identifications and permissions with access rights and protection of privacy and integrity of data stored on a smart device is disclosed (Figure 5). Multiple levels of security are permitted and the use of a single card for multiple user roles and multiple access methods are described (Figure 6). Application of the invention to situations involving air travellers identity (Figure 4), medical records and prescription (Figure 3) and secure employee access are illustrated.
A. CLASSIFICATION OF SUBJECT MATTER
IPC(?) : G06F 17/00
US CL : 705/41, 59, 90
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
U.S. : 705/41, 59, 90

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
NONE

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
WEST, DIALOG

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category</th>
<th>Citation of document, with indication, where appropriate, of the relevant passages</th>
<th>Relevant to claim No.</th>
</tr>
</thead>
</table>

Further documents are listed in the continuation of Box C.

Date of the actual completion of the international search: 18 JANUARY 2003

Date of mailing of the international search report: 22 AUG 2003
