(54) **Title:** SYSTEM AND METHOD FOR MANAGING CONTENT BETWEEN DEVICES HAVING DIFFERENT CAPABILITIES

(57) **Abstract:** A system and method for managing content between different client devices in various domains (such as vehicle, home, and person) includes a user interface, a wireless transceiver, and a controller. The user interface receives an input from a user to change the presentation of the content from a first client device to a second client device. The wireless transceiver wirelessly transmits the input from the user through the communication system. The controller, responsive to the input from the user, determines a content format for the second device. The controller may also determine whether the second device has a network capability for accessing the content format. If the second device has the network capability for accessing the content format, the controller transmits a data message to the second device to activate access to the content; otherwise, the controller

obtains the content and transmits the obtained content to the second device.

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents:

"A"	document defining the general state of the art which is not considered to be of particular relevance	"T"	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E"	earlier application or patent published on or after the international filing date	"X"	document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y"	document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O"	document referring to an oral disclosure, use, exhibition or other means	"&"	document member of the same patent family
"P"	document published prior to the international filing date but later than the priority date claimed
