(73) Assignee: **Microsoft Corporation**, Redmond, WA (US)

(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

(*) Notice: This patent is subject to a terminal disclaimer.

DESCRIPTION

(**) Term: **14 Years**

FIG. 1 is the first image in a sequence for a display screen with animated graphical user interface showing my new design;

FIG. 2 is the second image thereof;

FIG. 3 is the third image thereof;

FIG. 4 is the fourth image thereof;

FIG. 5 is the fifth image thereof;

FIG. 6 is the sixth image thereof;

FIG. 7 is the seventh image thereof; and,

FIGS. 8-14 are enlarged views of the portion of the display screen bounded by the uneven-length broken lines in FIGS. 1-7, shown separately and enlarged for clarity of illustration. The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-7 and FIGS. 8-14, respectively. The process or period in which one image transitions to another forms no part of the claimed design. The even-length broken line showing of the text, the icons, the remainder of the animated graphical user interface and the remainder of the display screen illustrate portions of the display screen with animated graphical user interface, and forms no part of the claimed design. The even-length broken line showing of an electronic device is for the purpose of illustrating environmental structure, and forms no part of the claimed design. The uneven-length broken line is for the purpose of identifying the area that is shown enlarged in FIGS. 8-11, and forms no part of the claimed design.
