Des. 92

Shuman S. Jewett & Francis H. Root, Buffalo, N.Y.
Letter Patent (design No. 92) dated Oct 3^d 1846

The schedule referred to in these Letters Patent and
making part of the same:

To all whom it may concern: Be it known

That we Sherman S Jewett and Francis M Root, of Buffalo in the County of Erie and State of New York, have invented and produced a new and useful design for a stove, for heating apartments, which we denominate the gothic stove; and we do hereby declare that the following is a full and exact description of the shape or configuration thereof and of the ornaments thereon.

Fig. 1 of the accompanying drawings is a side elevation thereof. Fig. 2. a front elevation, and fig. 3 a plan of the top plate. Fig. 4. is the hearth making a part of the bottom plate of the stove. On the side plate fig. 1. there are gothic panels *AA*, the borders of, and the intermediate spaces between which, have on them the ornamental devices shown on the drawing. The bottom plate is furnished with the ornamental border *B.B.* and above and between the upper portions of the gothic arches are the ornaments *C.C.* The front elevation fig. 2. has gothic arches, and other ornaments like those on the sides. The back elevation is the same, but being without a door the gothic panels are in all respects like those on the sides. Fig. 3. is the top plate which has the configuration represented, and at its edge the ornamental border *D.D.* It has on it an elevated scalloped flange *E.* from which rises the stove pipe collar *F.* Fig. 4. is a top view of the hearth, having on it the ornamental border and scrolls as represented.

Having herein fully set forth and represented the configuration of our gothic stove and the manner in which we form and distribute the ornaments thereon, what we claim as new, and desire to secure by Letters patent, is the exclusive right to a stove so formed and ornamented.
