UNITED STATES PATENT OFFICE.

STEPHEN A. GLYNN, OF ANTIGO, WISCONSIN, ASSIGNOR OF ONE-HALF TO WILLIAM GRIFFITH AND MICHAEL E. ENTZMINGER, BOTH OF GREEN BAY, WISCONSIN.

GARMENT-HOLDER.

1,268,075. Specification of Letters Patent. Patented May 28, 1918.

Application filed September 6, 1917. Serial No. 190,012.

To all whom it may concern:

Be it known that I, STEPHEN A. GLYNN, a citizen of the United States, and a resident of Antigo, in the county of Langlade and State of Wisconsin, have invented a new and useful Garment-Holder, of which the following is a specification.

The object of my invention is to provide a novel device for retaining a garment in its customary and desired position, and which may be readily attached and removed and which may be manufactured at small expense.

It is an especial object of my invention to provide an attachment which will be of great convenience to soldiers who are not permitted to wear suspenders.

In the accompanying drawings illustrating my invention:

Figure 1 is a perspective of the device; and

Fig. 2 is a section on line 2—2 of Fig. 1.

Like numerals designate like parts in each of the views.

Referring to the accompanying drawings, I provide elongated holder 1, which may be made of suitable material such as tin, whalebone, or aluminum. Pivotally attached to the ends of holder 1 by members 5 are suitable fastening elements such as pins 2. Secured over one side of holder 2 I provide a suitable rubber garment holder 3 having short projecting teeth 4 which frictionally engage the adjacent garment.

The manner of using the device is to pin it to the inside of the trousers band or the inside of a lady's belt to prevent the shirt or shirtwaist from pulling up.

What I claim is:

In a garment supporting device, the combination of an elongated flexible member, a toothed rubber garment retaining strip secured over one side of the flexible member to frictionally engage a garment, and securing pins pivotally attached to the ends of the flexible member to adjustably engage the adjacent garment, substantially as shown.

STEPHEN A. GLYNN.
