(54) Title: TRANSITIONS HAVING DISPARATE SURFACES

(57) Abstract: A structure to form flooring transitions having outer surfaces comprising two disparate materials. In a preferred embodiment the flooring transitions includes a T-shaped molding and at least one attachment thereto. The outer surfaces of the T-molding and attachment may be comprised of different materials, even though they may sometimes have the same pattern or decor. For example, the T-molding may have a surface of real wood or veneer and the attachment may have an outer surface of abrasion resistant foil, metal, or even a visual perception element, such as lights or reflective tape. A kit is also disclosed.
