UNITED STATES PATENT OFFICE.

EMMA J. DYKEMAN, OF RURAL GROVE, NEW YORK.

DESIGN FOR A BAKING-TIN.

SPECIFICATION forming part of Design No. 26,152, dated October 6, 1896.

Application filed August 5, 1896. Serial No. 601,816. Term of patent 14 years.

To all whom it may concern:

Be it known that I, EMMA J. DYKEMAN, a citizen of the United States, residing at Rural Grove, in the county of Montgomery and State of New York, have invented and produced a certain new and original Design for a Baking-Tin; and I do declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it appertains to make and use the same.

Figure 1 is a perspective view of a bake-pan for cookies and the like embodying my design, and Fig. 2 is a central transverse section of the same.

The leading feature of my design consists in a sheet-metal plate A, having integral beaded edges *a'* and integral ears *aa*, stamped

up, as shown. The edges *a'* serve as legs or supports on which it rests, while the ears *aa* serve as handles by means of which it may be manipulated.

The pan is rectangular in shape, and the size may be such as will conform to the uses to which it is intended.

What I claim as new and useful, and desire to secure by Letters Patent of the United States, is—

The design for a bake-pan, substantially as shown and described.

In testimony whereof I hereunto affix my signature in presence of two witnesses.

EMMA J. DYKEMAN.
