UNITED STATES PATENT OFFICE.

WILLIAM H. KUNTZ, OF MOUNT ROCK, PENNSYLVANIA.

IMPROVEMENT IN HOISTING APPARATUS.

Specification forming part of Letters Patent No. **71,393**, dated November 26, 1867.

To all whom it may concern:

Be it known that I, WILLIAM H. KUNTZ, of Mount Rock, Cumberland county, State of Pennsylvania, have invented an Improved Hoisting Apparatus; and I do hereby declare the following to be an exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon, making a part of this specification.

A represents the slide, made of wood or metal, having three eyes, B B B, one at each end and the third near the center. The rope C is fastened at one end of the slide A permanently. It is then passed up through the center eye B, and from thence up and through the top eye B and upper end of the slide, leaving a loop, D, formed below. In this loop D a sack of salt, grain, hay, or bundles of straw are inserted or placed, and by drawing up the upper end of rope C the articles placed in the loop are held tightly by the loop D, and hoisted wherever required.

What I claim as my invention, and desire to secure by Letters Patent, is—

The slide as constructed, combined, and operated with the rope, as herein described, and for the purpose set forth.

WILLIAM H. KUNTZ.
