CLAIM

The ornamental design for a portable defibrillator, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of the portable external defibrillator having a top lid in a closed position;
FIG. 2 is a top view of the portable external defibrillator of FIG. 1;
FIG. 3 is a bottom view of the portable external defibrillator of FIG. 1;
FIG. 4 is a front elevational view of the portable external defibrillator of FIG. 1;
FIG. 5 is a rear elevational view of the portable external defibrillator of FIG. 1;
FIG. 6 is a side elevational view of the portable external defibrillator of FIG. 1;
FIG. 7 is a side elevation view of the portable external defibrillator of FIG. 1 taken from the opposite side of FIG. 6;
FIG. 8 is a top perspective view of a semi-automatic embodiment of the portable external defibrillator having a shock button, wherein a top lid of the defibrillator is in an open position;
FIG. 9 is a top perspective view of the fully-automatic embodiment of the portable external defibrillator without a shock button, wherein a top lid of the defibrillator is in an open position;
FIG. 10 is a top view of the portable external defibrillator of FIG. 8;
FIG. 11 is a top view of the portable external defibrillator of FIG. 9;
FIG. 12 is a bottom view of the portable external defibrillator of FIGS. 8 and 9;
FIG. 13 is a front elevational view of the portable external defibrillator of FIGS. 8 and 9;
FIG. 14 is a rear elevational view of the portable external defibrillator of FIGS. 8 and 9;
FIG. 15 is a side elevational view of the portable external defibrillator of FIGS. 8 and 9; and,
FIG. 16 is a side elevational view of the portable external defibrillator of FIGS. 8 and 9 taken from the opposite side of FIG. 15.
