UNITED STATES PATENT OFFICE.

MUNSON HINMAN, OF HALLOCK, ILLINOIS.

IMPROVEMENT IN WHIFFLETREE-STAPLES.

Specification forming part of Letters Patent No. **151,026**, dated May 19, 1874; application filed March 7, 1874.

To all whom it may concern:

Be it known that I, MUNSON HINMAN, of Hallock, Peoria county and State of Illinois, have invented a new and useful Improvement in Whiffletree-Staple, of which the following is a specification:

Figure 1 is a top view of my improved staple. Fig. 2 is a rear view of the same; and Fig. 3 is a detail section of the same, taken through the line *x x*, Fig. 2.

Similar letters of reference indicate corresponding parts.

My invention has for its object to furnish an improved whiffletree-staple, which may be readily attached to the whiffletree, and shall be strong and durable. The invention consists in an improved whiffletree-staple formed of the loop and strap cast in one piece, as hereinafter fully described.

A is the loop, and B is the strap, of the staple, which are cast of malleable iron in one piece. In the end parts of the strap B are formed holes to receive the bolts by which the staple is secured to the whiffletree.

The staple A B thus constructed can be readily attached to the whiffletree, and will be strong and durable, and at the same time may be neat in appearance.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

A whiffletree-staple formed of the loop A and strap B cast in one piece, substantially as shown and described.

MUNSON HINMAN.
