(54) Title: SYSTEM AND METHOD FOR CREATING DISTRIBUTED APPLICATION

(57) Abstract: Templates are used to define the validation, input, permission, and workflow rules of a business process. Template building (99) is done using a template builder (100) that may be a component such as, but not limited to, a software module running on one or more hardware platforms, such as a computing device (98) having a suitable user interface and console. The template builder (100) is capable of building, editing and storing a specific template. The builder (100) may be constructed as a software module running on the computing device (98) using any suitable computing technology including, but not limited to, an Internet application using (HTML, Website Meta Language (WML), or other browser, a personal computer (PC) program, or a portable device program or any suitable combination thereof.
