(54) Title: MAKEUP PROCESS

Fig. 1

(57) Abstract: The present invention relates to a process for making up the skin (P), comprising the step that consists in forming, on a deposit of a foundation composition (1) applied to the skin (P), a discontinuous deposit (20) of islets (2) of corrective composition and/or a deposit of corrective composition comprising visible substances that give it an inhomogeneous appearance, the said corrective composition having optical properties that locally modify the appearance of the makeup so as to create a pattern reproducing the appearance of skin relief and/or colour heterogeneities.

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IB2012/057639

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☒ Claims Nos.: 27-72
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- ☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-26

Process for making up the skin (P), comprising the step that consists in forming, on a deposit of a foundation composition (1) applied to the skin (P), a discontinuous deposit (20) of islets (2) of corrective composition and/or a deposit of corrective composition (81) comprising visible substances (4) that give it an inhomogeneous appearance, the said corrective composition having optical properties that locally modify the appearance of the makeup so as to create a pattern reproducing the appearance of skin relief and/or colour heterogeneities (independent claim 1).

A kit comprising at least said (a) foundation composition (1), (b) the corrective composition (81) and (c) an applicator (40) for the application of said corrective composition (81) (independent claim 25).

A kit comprising at least said (a) foundation composition (1), (b) the corrective composition (81) and (c) an applicator (40) for the application of said corrective composition (81) (independent claim 26).

2. claims: 27-50

Process for making up the skin (P), comprising the steps consisting in: a) applying a foundation composition (1), and b) a corrective composition (81), the corrective composition comprising visible substances (4) that give it an inhomogeneous appearance, the said visible substances (4) preferable being coloured fibres (independent claim 27).

A kit comprising at least said (a) foundation composition (1), (b) a device (40) for locally removing and/or moving foundation (1) deposited on the skin, and c) optionally, a screen (50) with holes, and d) optionally, a system (210) for spraying material (independent claim 50).

3. claims: 51-72

Cosmetic device (40) having a peripheral surface (41) comprising islets (42;120) arranged non-uniformly in a surrounding surface, ...so as to lead to the creation on the skin of a pattern whose appearance is linked to the arrangement of the islets (42;120) on the surface (independent claim 51).

Assembly (80) comprising said device (40), a make-up product (1) intended to be applied to the skin (P) by means of the said device (40) (independent claim 65).

Kit (80) comprising said device (40) and a master surface for creating islets on the surface, especially a master face having some zones loaded with product and others without product (independent claim 66).

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 27-72

This Authority considers that the application does not meet the requirements of unity of invention and that there are 3 inventions covered by the claims indicated as follows:

Invention 1: Claims: 1-26

Invention 2: Claims: 27-50

Invention 3: Claims: 51-72

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guidelines C-IV, 7.2), should the problems which led to the Article 17(2) declaration be overcome.
