(54) **Title**: ACCOUNT DATA RECONCILIATION

Figure 2

(57) **Abstract**: A method and apparatus for correcting account data. First data and second data corresponding to an account are received. The first data is compared to the second data to identify any discrepancy between the first and second data. A possible cause of the discrepancy is automatically identified and the discrepancy is selectively corrected by modifying at least one of the first data and the second data in response to the identified possible cause.
