(54) Title: REMOTE PROCESS EXECUTION MANAGEMENT

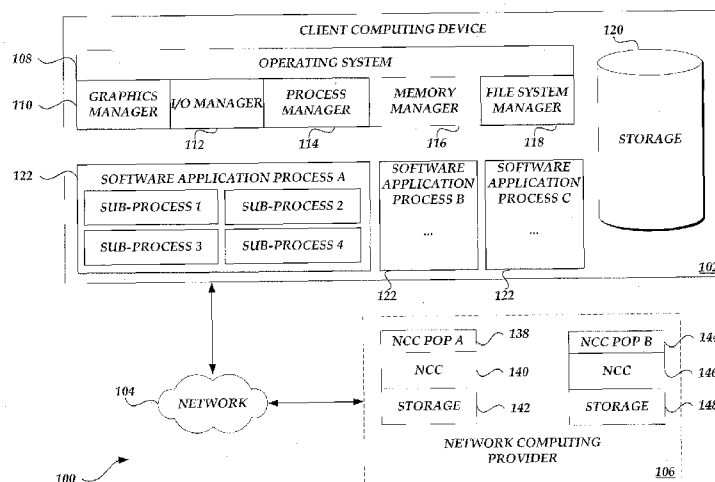

Fig. 1.

(57) Abstract: A remote execution management process is directed to the execution and management of aspects of a software process instance at a network computing provider. A client computing device may instantiate a software process instance. The client computing device determines a remote process configuration for the software process instance, including identifying at least one sub-process of the software process instance for execution at the network computing provider. The client computing device may provide the remote session configuration information to the network computing provider. Based on the remote session configuration information, the network computing provider may instantiate a remote session corresponding to the at least one sub-process. The network computing provider may transmit processing results back to the client computing device associated with execution of the least one sub-process by the remote session.

A. CLASSIFICATION OF SUBJECT MATTER
 INV. G06F9/50
 ADD.
 According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
 Minimum documentation searched (classification system followed by classification symbols)
 G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
 EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
