(54) Title: TRANSACTION ENABLED INFORMATION SYSTEM

(57) Abstract: A system for providing transaction-enabled information includes a first application server and at least one second application server. The first application server provides access to plurality of sites. Each of the plurality of sites is associated with at least one transaction grammar. The at least one second application server receives user input. The at least one second application server analyzes the user input to identify a first transaction grammar. The at least one second application server then identifies a task to determine information from one or more of the plurality of sites associated with the first transaction grammar. The at least one second application server performs the task to generate, based on the first transaction grammar, a message indicative of a first transaction based on information received from the one or more of the plurality of sites.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
