UNITED STATES PATENT OFFICE.

JABEZ M. WATERS, OF CINCINNATI, OHIO.

DESIGN FOR CHAIRS.

Specification forming part of Design No. 6,894, dated September 23, 1873; application filed May 10, 1873.
[Term of Patent 14 years.]

To all whom it may concern:

Be it known that I, JABEZ M. WATERS, of Cincinnati, county of Hamilton, State of Ohio, have invented a Design for a Chair, known to the trade as "The Oriental Chair," of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

The several parts of the chair are as follows: A wooden or other seat, A, which is much wider than it is deep, and is inclined downward from front to rear at an angle, as shown in the illustration, the pitch being about three inches, more or less; turned legs B, stretchers C, and spindles D and *d*, whereof the latter, namely *d*, may be continuous with D directly under them, as in Fig. 2, or separate pieces, as in Fig. 1; a heavy bent "office rim," E, the extremities of which are bent downward and firmly fastened to the seat,

and an additional bent back rim, H, above the former, with its extremities firmly fastened to it at L.

This chair may be made of different sizes, as shown in the illustrations.

Fig. 2 differs from Fig. 1, in having a higher back, but the two are the same in every essential particular.

I do not claim, separately, any of the several parts enumerated.

What I claim as my invention is—

A design for a chair, the essential features of which are the combination of the two bent rims, as described, with turned spindles, legs, and stretchers, and inclined seat, so as to form a chair embodying my design, substantially as specified.

JABEZ M. WATERS.
