Title: PRESENTING SOCIAL SEARCH RESULTS

Abstract: Methods, systems, and apparatus, including computer programs encoded on a computer storage medium, for detecting malicious system calls. In one aspect, a method includes identifying members of a social affinity group of the user, the social affinity group having members having a relationship to the user. The method includes receiving search results including search results that reference resources associated with members of the social affinity group. The method includes identifying a first search result that references the social network site. The method includes identifying a second search result that references a resource found on the social network site and associated with a member of the social affinity group. The method includes generating a response to the query comprising instructions that the first search result be presented in proximity to the second search result.
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER

G06F 17/30(2006.01)i, G06Q 50/30(2012.01)i

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

G06F 17/30, G06F 15/16, G06F 7/05

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

Electronic database consulted during the international search (name of data base and, where practicable, search terms used)
eKOMPASS(KIPO internal) & Keywords: social, network, search, affinity, group, site
