(54) Title: COLLAPSIBLE PORTABLE TOILET

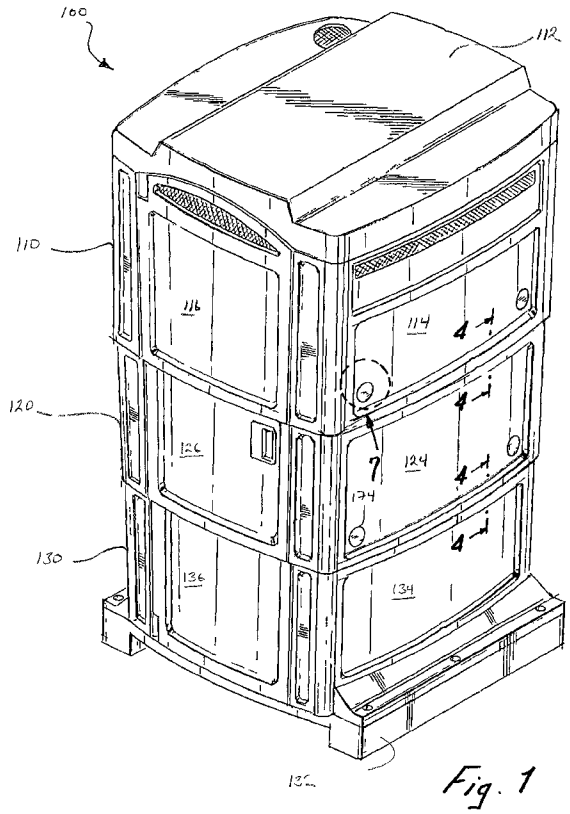

Fig. 1

(57) Abstract: A collapsible enclosure is provided having a top section with a roof, top wall member, and a top door panel, a middle section with a middle wall member and a middle door panel, and a bottom section with a base, a bottom wall member, and a bottom door panel. The middle section is telescopically movable with respect to the top section, and the bottom section is telescopically movable with respect to the middle section such that the sections collapse into each other in a nesting fashion. The door panels are slidably coupled to be telescopically movable with respect to each other. When in a raised position, the enclosure serves as a privacy enclosure or temporary restroom facility. When in the lowered position, the enclosure is stackable for transportation and storage. The enclosure is self-contained, has no loose parts needed for assembly and may be installed with a minimum of tools.
