(54) Title: TETRAHYDROFURANS AND TETRAHYDROPYRANS

(57) Abstract

Novel odorants or odorant compositions which are characterized by a content of one or more compounds selected from the group consisting of tetrahydrofurans of structures (I) or tetrahydropyrans of structure (I"), wherein R can be an aliphatic chain, namely a chain of at least four carbon atoms substituted with at least three methyl groups in the chain, a monocarbocyclic residue, where monocarbocyclic refers to one ring of 5-8 carbon atoms, and with at least two methyl groups, e.g. on the ring, or the residue of a bicyclic ring system, where bicyclic refers to two carbon rings, having between 5-8 carbon atoms, fused together, the bicyclic system substituted with at least two methyl groups, or R + R^3 can also

(I)

(I")

form a spirocyclic moiety in case of the tetrahydrofurans, and wherein R^1 = H or CH_3, or a higher alkyl group, R^2 = H, CH_3, or a higher alkyl group, R^3 = H, or CH_3, R^4 and R^5 = H, CH_3, or a higher alkyl group, and wherein $R^1 = R^2 \neq H$.

PCT/EP 95/05002

A. CLASSIFICATION OF SUBJECT MATTER
IPC 6 C07D307/06 C07D309/04 A61K7/46

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 6 C07D A61K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

[X] Patent family members are listed in annex.

* Special categories of cited documents :

'A' document defining the general state of the art which is not considered to be of particular relevance

'E' earlier document but published on or after the international filing date

'L' document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

'O' document referring to an oral disclosure, use, exhibition or other means

'P' document published prior to the international filing date but later than the priority date claimed

'T' later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

'X' document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

'Y' document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
