Sonnenstraße 33
80331 München (DE)

(54) **Information processing apparatus, method, and program for displaying additional image information**

(57) An information processing apparatus includes: a display unit displaying an image; an operation input receiving unit receiving a user's operation performed on the display unit; and a display control unit carrying out display control when the operation input receiving unit receives a predetermined operation, the display control

allowing the state of the display on the display unit to transit from one of a first state of display in which an image is displayed as the front side of a card and a second state of display in which an additional information image including one or more pieces of additional information associated with the image is displayed as the rear side of the card to the other.

FIG.1

Application Number
EP 09 16 6692

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 09 16 6692

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
