(54) Title: SYSTEM AND COMPUTER IMPLEMENTED METHOD FOR FACILITATING COLLECT ON DELIVERY TRANSACTIONS

Figure 2

(57) Abstract: A system and computer implemented method for facilitating collect on delivery (COD) transactions may be implemented using specially programmed, general purpose computers connected to a data network. The process may be implemented using an interface provided by the COD provider and accessible to a vendor and customer. A COD payment from the customer is transferred to the COD provider. The COD provider transfers funds to the vendor upon transfer of the payment, then holds the payment for a predetermined amount of time before processing the COD payment. If the customer desires additional time before the payment is processed, they may access the COD provider via an interface and electronically change the COD payment processing date.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
