The ornamental design for an automotive system calibrating apparatus, as shown and described.

DESCRIPTION

Cross reference is made to copending U.S. design patent application Ser. No. 29/532,553 entitled "Automotive System Calibrating Apparatus" by Leikert et al., which was filed on Jul. 8, 2015; and U.S. design patent application Ser. No. 29/532,560 entitled "Automotive System Calibrating Apparatus" by Leikert et al., which was filed on Jul. 8, 2015.

FIG. 1 is a perspective view of an automotive system calibrating apparatus showing my new design;

FIG. 2 is a rear elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 3 is a front elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 4 is a right side elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 5 is a left side elevational view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 6 is a top plan view showing the design for the automotive system calibrating apparatus of FIG. 1;

FIG. 7 is a bottom plan view showing the design for the automotive system calibrating apparatus of FIG. 1; and,

FIG. 8 is another top plan view of the automotive system calibrating apparatus of FIG. 1.
