(54) Title: PRECISE POSITION DETERMINATION OF ENDOSCOPES

(57) Abstract

A locatable endoscope (14) attachment including an attachment (20) connectable to an insertion tube portion of an endoscope for determining the endoscope's (14) position; and one or more sensors (22), fixedly positioned with respect to the attachment (20), which are used for determining the positions of the one or more sensors (22). Preferably, when the attachment (20) is fixedly attached to the endoscope (14), the one or more sensors (22) are distanced from elements of the endoscope which interfere with determining the positions of the one or more sensors (22).

INTERNATIONAL SEARCH REPORT

International application No.
PCT/IL97/00061

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This international report has not been established in respect of certain claims Linux Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
Please See Extra Sheet.
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite paymen of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this international search report cover only those claims for which fees were paid, specifically claims Nos.:
4. X No required additional search fees were timely paid by the applicant. Consequently, this international search report restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-21
Remark on Protest
No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No. PCT/IL97/00061

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In order for all inventions to be searched, the appropriate additional search fees must be paid.

Group I, claims 1-21, drawn to a locatable attachment comprising position sensors and the combination of such attachment with an endoscope.

Group II, claims 22-24, drawn to a locatable medical device comprising a sheath.

Groups I and II, the inventions listed as these groups do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason: Group II does not require position sensors as required in Group I.
