(54) **Title**: METALLIZED FILMS, PRESSURE-SENSITIVE LABEL STRUCTURES, AND METHODS OF MAKING SAME

(57) **Abstract**: Multilayer polymer films are described. The films include an oriented polymeric substrate wherein a print-side skin layer of the substrate has a surface roughness, Ra, ≤ 12.0 μm. The films also include a metal layer in surface contact with the print side of the polymeric substrate, a primer composition in surface contact with the metal layer, and a printable topcoat layer in surface contact with the primer composition. Pressure-sensitive label structures and methods of making such films are also described.

A. CLASSIFICATION OF SUBJECT MATTER
INV. B32B15/08 B32B15/085 B32B27/32 C09J7/02 G09F3/10
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
B32B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
EPO-Internal, WPI Data

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
