FORM 2

THE PATENTS ACT, 1970
(39 of 1970)
&
THE PATENT RULES, 2003

Complete Specification

(See section 10 and rule 13)

1.Title of the Invention :

CAR CLEANING SYSTEM IN CAR ITSELF

2. Applicant Name : **BHARATH UNIVERSITY**

Nationality : Indian

Address : 173, Agharam Road, Selaiyur, Chennai 600 073

3. Preamble to the Description :

The following specification particularly describes the invention and the manner in which it is to be performed.

DESCRIPTION

Field of the invention

This invention relates to the field of cleaning equipment and more particularly to an automobile cleaning equipment.

Background of the invention

Every home or office usually has an automobile these days. The automobiles are an indispensable tool for transportation these days. However, it is a monotonous task to keep the automobiles such as cars clean. Due to high dust pollution in our environment, a sheet of dust and dirt forms on the automobile even in a few hours.

To effectively clean the automobile, a novel solution is provided in this invention. This invention discloses the use of a Car Cleaning system that is available in the car itself.

Detailed description of the invention

Automatic car self cleaning equipment disclosed in this invention is an innovative method to wash cars. The Cleaning system can comprise of a range of technologies such as Entry level in-bumper

systems to Conveyor systems with respect to the washing technology. The cleaning system provides for the use of High pressure equipment and brush equipments.

The invention disclosed here helps to combine the benefits of an in-bay automatic with the advantages of an express cleaning, but without the difficulties of a conveyor system. The system provides for its self cleaning whenever we want and wherever we want.

Mode of operation

One or more car cleaning brushes attached inside front bumper and another one or more car cleaning brushes are attached in the rear side bumper. When the car is in parked condition, a switch may be operated to turn on the cleaning. Once switched on, front brushes and rear brushes moving in longitudinal way and transverse way start cleaning car side and top surfaces. The cleaning system is also connected with a water and dryer. When the brushes are in operation, moving water will be sprayed to clean the car .
