Title: SYSTEM AND METHOD FOR AGGREGATING, EDITING, AND DISTRIBUTING CONTENT

Abstract: A system and method for the distribution of content to subscribers while maintaining the distribution rights associated with the content. Tags identifying aspects and features, including distribution rights, of the content are associated with the content. The tagged content is aggregated into a centralized data center that receives requests from subscribers to access the content. The tags associated with the requested content are evaluated to determine if the subscriber is authorized to access the content before the content is provided to the subscriber.
before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments. For two-letter codes and other abbreviations, refer to the “Guidance Notes on Codes and Abbreviations” appearing at the beginning of each regular issue of the PCT Gazette.
