(54) Title: DOMESTIC RAT TRAP

(57) Abstract: A domestic rat trap using available accessories is provided. The machine in general comprises: food hook, hammer lock, hammer, hammer clip, trigger, trigger point, spring small 1&2, spring big 1&2, body of the trap(bottom), body of the trap(top), spindle, spindle lock, major, H-shape, stopper, hole and spring lock. Place the food stuff on food hook of the trap by pressing gently. The tip of the food hook should be touched with the plastic base below the hook, the check hammer lock is inclined to the front of the trap. There is a trigger at the bottom of the back side of the trap. Press this trigger if the hammer lock lies upward, then the hammer lock will come towards the front side. This hammer lock works like the door lock mechanism of motor vehicles. So just press the hammer lock with the hammer to lock it. The hammer is specially designed to fall on the neck of the rat, when they touch the food stuff. This 400gm weighing device can easily trap and kill the rat of any size.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/IN2012/000241

A. CLASSIFICATION OF SUBJECT MATTER

A01M23/24(2006.01)i

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC: A01M23/-

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CNKI;CNPAT;WPI;EPODOC:rat?,mouse?,animal,trap?,spring?,hammer+,fall+,strik+,press+,smash+,trigger+,lock+,stopper,bait,food,hook?engag+

☐ Further documents are listed in the continuation of Box C.☒ See patent family annex.

* Special categories of cited documents:	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"A" document defining the general state of the art which is not considered to be of particular relevance	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"E" earlier application or patent but published on or after the international filing date	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"L" document which may throw doubts on priority claim (S) or which is cited to establish the publication date of another citation or other special reason (as specified)	"&"document member of the same patent family
"O" document referring to an oral disclosure, use, exhibition or other means	
"P" document published prior to the international filing date but later than the priority date claimed	

Date of the actual completion of the international search 14 Sep.2012(14.09.2012)	Date of mailing of the international search report 08 Nov. 2012 (08.11.2012)
