(54) Title: A SECURE ACCESS METHOD AND SYSTEM

(57) Abstract: A secure electronic content system and method (100) is provided. The system includes a controller including an interface component (150), a host system coupled to the controller (120), the host system configured to present content under pre-determined conditions, the host system operable with a navigation protocol, the host system further including a system manager operable with an associations component configured to be at least partially run by the host system, a translator configured to provide meanings and generate commands within the host system at least a first digital rights management (DRM) component (140) configured to provide encoding and access rules for the content; and a file system component including a file system application programming interface (API) configured (150) to provide a logical interface between a plurality of components.
