ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD, APPARATUS AND SYSTEM FOR MANAGEMENT OF INFORMATION CONTENT FOR ENHANCED
ACCESSIBILITY OVER WIRELESS COMMUNICATION NETWORKS

(57) Abstract: Information content is managed in a network-based communication system by providing a content management site accessible to a user of the system (10). The content management site is configured so as to permit the user to enter information in accordance with a specified format having a plurality of selectable mobile information channels each corresponding to an information category. The entered information is processed to generate for the user a mobile site comprising information content that is accessible via one or more mobile devices (15) over a wireless network (12) of the system (10). The information content of the mobile site is preferably configured so as to integrate therewith information associated with at least one messaging action, collaboration action, location-based service action, or other wireless networking functionality of the wireless network (12).

INTERNATIONAL SEARCH REPORT
