# UNITED STATES PATENT OFFICE.

JAMES A. WATTERSON, OF AREDALE, IOWA.

## DESIGN FOR A REIN-HOLDER.

SPECIFICATION forming part of Design No. 35,152, dated October 1, 1901.

Application filed July 26, 1901. Serial No. 69,856. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, JAMES A. WATTERSON, a citizen of the United States, and a resident of Aredale, in the county of Butler and State  
5 of Iowa, have invented and produced a new and original Design for a Rein-Holder, of which the following is a full, clear, and exact description.

The design consists of spaced shanks A and  
10 B of approximately the same length and united at their upper ends by a loop C, which somewhat overhangs the shank B, the lower terminal A' of said shank A being curved outwardly and the lower end of the shank B terminating in an outwardly-projecting loop D,  
15 from the inturned portion of which extends upwardly and outwardly a slightly-curved bar E, the lower end of which lies close to the

shank B and the upper end of said bar terminating in an eye F, the said shanks A and B, 20 the loops C and D, the bar E, and the eye F extending in the same plane.

The leading feature of the design consists of the shanks, the loops, and the bar.

Having thus described my invention, I 25 claim as new and desire to secure by Letters Patent—

The design for the rein-holder herein shown and described.

In testimony whereof I have signed my 30 name to this specification in the presence of two subscribing witnesses.

JAMES A. WATTERSON.
