(54) **An improved marker pen**

(57) This invention relates to an improved Marker Pen with a convenient and easy ink refilling arrangement, comprising a Fibre tip and ink reservoir cartridge, which are provided in the outer cover (body/barrel) and works simply by press-fitting, with complete and satisfactory results. This invention also provides a Cap, which is internationally required to be suitable for use by children, who

in normal use can inadvertently suck back the Cap in mouth during working, which sometimes slips in the throat causing choking and difficulty in breathing, and in some cases may cause death of a child. This Cap is manufactured by providing proper ventilation holes so that adequate breathing should continue if the Cap is sucked into one's throat.

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 09 16 2199

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
