(54) Title: SYSTEM AND METHOD FOR SUPPORTING AN OBJECT ORIENTED SCRIPTING TOOL

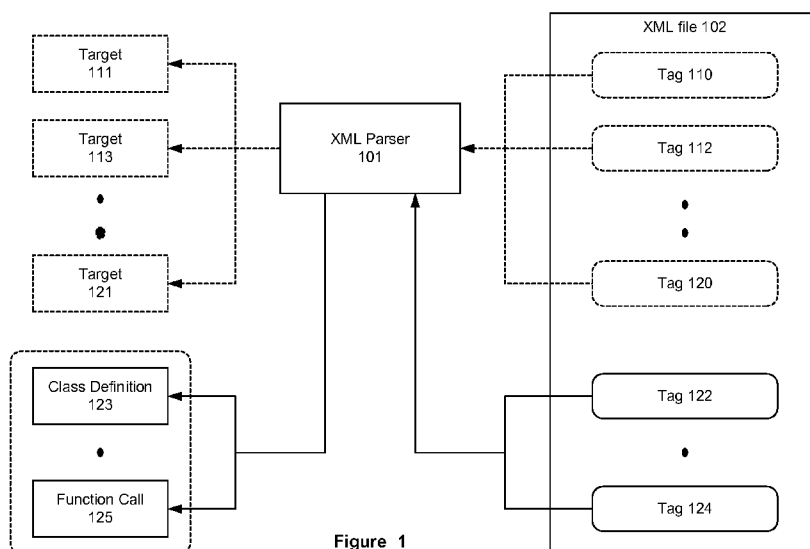

Figure 1

(57) Abstract: An object-oriented scripting tool uses a XML file for software development and domain management. The XML file includes at least a first tag that defines a scripting class in an object-oriented scripting language. The scripting class includes at least one method, which is defined in a second tag in the XML file. A generic software development and domain management script can be encapsulated into a general scripting class, which can be extended into individual scripting class for specific software development and domain management task.
