(54) Title: A SPECTACLES HOLDER DEVICE

(57) Abstract: A spectacles holder device for holding in a sepa-
rable manner a pair of spectacles (A) on the clothes of a user,
comprising supporting means (10) , provided with a magnetic el-
ement (11) for being associated to the clothes, as well as holding
means (20) : the latter being mechanically associated to the pair
of spectacles (A) and susceptible of magnetically connecting to
the supporting means (10) for holding the pair of spectacles (A)
on supporting means (10) . The holding means (20) comprises a
threaded rod (22) arranged along the rotation axis and one cou-
pling element (21) , made of a magnetic material , mechanically
connected to the threaded rod and magnetically connecting to the
magnetic element (11) . The coupling element (21) is arranged
in line with the rotation axis (X) or between the latter and the free
end of the temple, so that when the magnetic interaction between
the magnetic element (11) and the coupling element (21) orien-
tates the temples towards the clothes, the glasses are prevented
from contacting the clothes themselves .

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
 "E" earlier document but published on or after the international filing date
 "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
 "O" document referring to an oral disclosure, use, exhibition or other means
 "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
 "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
 "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
