(54) Title: INTERACTIVE TELEVISION PROGRAM GUIDE FOR RECORDING ENHANCED VIDEO CONTENT

(57) Abstract: Interactive television systems and methods are provided for enhancing program guide content using recording and alert features for video related to promotions, advertisements, and other selectable displays presented in an interactive television application such as an interactive television program guide. An option to record video related to a selectable display may be presented to users. The option to record may be presented in an information display screen that is displayed in response to a user selecting a selectable display. The interactive television system may automatically record the related video in response to the user selecting the record option using a local or a network-based recording and storage device. Users may access a list of recordings that have been recorded. Other types of media may be integrated into the list, and listings may be selected and viewed by the user.
