

## **ABSTRACT**

### **“PROCESS FOR THE SYNTHESIS OF TELAPREVIR, OR PHARMACEUTICALLY ACCEPTABLE SALTS OR SOLVATES AS WELL AS INTERMEDIATE PRODUCTS THEREOF”**

The invention relates to a process for the preparation of telaprevir, or a pharmaceutically acceptable salt or solvate thereof, wherein the process requires a smaller number of process steps and/or does not require the use of toxic and instable compounds compared to the known processes. Another embodiment refers to telaprevir, or a pharmaceutically acceptable salt or solvate thereof as well as to intermediate products for preparation of the same, wherein the afore-mentioned products are obtained by the process described herein.
