SPIROCYCLIC QUINAZOLINE DERIVATIVES AND THEIR USE AS PDE7 INHIBITORS

(57) Abstract: This invention relates to spirocyclic derivatives, compositions containing the uses of such derivatives. The spirocyclic derivatives of the present invention are PDE7 inhibitors and have a number of therapeutic applications, particularly in the treatment of pain, especially neuropathic pain. The invention provides a compound of formula (I); wherein: X is O; S or N-CN; R1 is halogen or N-CN; A is a single bond, CH2; 0 or S; B is a single bond, CH2 or OCH2; each R2 is independently halogen, (Cl-,alkyl optionally substituted by 1 to 3 fluorine atoms), OH, (Cl6-)alkOH, (Cl6-)alkthio or CN; R is selected from the following groups (i) to (x).
