Title: SYSTEM AND METHOD FOR REVIEWING MEDICAL AND FINANCIAL CLAIM RECORDS

Abstract: A method and system that identifies pass-through items, medications, and/or sub-procedures that are typically associated with the performance of medical procedures yet not listed on corresponding medical claims. The method includes the steps of storing a database of medical records on a first computer storage medium (180), storing a database of event codes on a second computer data storage medium (210), and electrically transmitting the database of records to the second computer data storage medium (190). Each event corresponds to a pass-through item, medication, or sub-procedure.

☐ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent published on or after the international filing date
  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to an oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed

"I" inter document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"A" document member of the same patent family
