(54) Title: SPECIMEN HANDLING DEVICE

(57) Abstract: A specimen handling device includes a body interposed between a first receptacle configured to removably secure a specimen container and a second receptacle configured to removably secure a medical device. The specimen handling device may further include auxiliary structure for removably securing the specimen container and/or the medical device to the first and/or the second receptacle, respectively. Accordingly, the specimen handling device allows a user to manipulate the specimen handling device with one hand.
