(54) Title: PRINTER DOCUMENT VIEWER

(57) Abstract: Systems and corresponding methods that
  facilitate printing and controlling the printing process for multiple
documents on a printing apparatus are provided. Multiple users may
select a document for printing by interacting with control menus
available at the printing site. In
  one embodiment, a printing system
  for processing one or more print
requests includes: a print queue
  for storing data associated with
  one or more print requests, the print
  requests stored in a queue in the
  order received; a display screen
  for displaying the content of the
  print queue; control interface for
  controlling the processing order
  of the print requests in the queue;
  and executable code stored in a
  memory, wherein execution of the
  code by a processor causes the
  processor to process the print
  requests stored in the queue in
  response to user interaction with the
  control interface.
