- (54) Title: SYSTEM AND METHOD FOR RELICENSING CONTENT

(57) Abstract: A method, computer program product and system for indicating the occurrence of a relicensing trigger event on a client electronic device includes generating a license request for the client electronic device. An expiration indicator is received for a subscription associated with the client electronic device. A device license is created for the client electronic device that includes the license request and the expiration indicator. A secure device license is created by digitally-securing the device license.
