(57) **CLAIM**

The ornamental design for an indirect linear fixture, as shown and described herein.

DESCRIPTION

FIG. **1** is a front perspective view of a lighting fixture according to an embodiment of the present invention.

FIG. **2** is a left end elevation view of a lighting fixture according to an embodiment of the present invention with the right end of the lighting fixture being a mirror image.

FIG. **3** is a left side partial front elevation view of a lighting fixture according to an embodiment of the present invention.

FIG. **4** is a right side partial front elevation view of a lighting fixture according to an embodiment of the present invention.

FIG. **5** is a left partial bottom elevation view of a lighting fixture according to an embodiment of the present invention with the opposite side being a mirror image.

FIG. **6** is a right partial bottom elevation view of a lighting fixture according to an embodiment of the present invention with the opposite side being a mirror image.

FIG. **7** is a left partial top elevation view and a right partial top elevation view of a lighting fixture according to an embodiment of the present invention.

FIG. **8** is a perspective view of a lighting fixture according to an embodiment of the present invention.

FIG. **9** is a front elevation view of a lighting fixture according to an embodiment of the present invention with the opposite side being a mirror image.

FIG. **10** is a bottom elevation view of a lighting fixture according to an embodiment of the present invention; and,

FIG. **11** is a top elevation view of a lighting fixture according to an embodiment of the present invention.

The broken lines in the drawings illustrate portions of the indirect linear fixture which form no part of the claimed design.

The break lines in FIGS. **8-11** indicate that the appearance of any portion of the indirect linear fixture between the break lines forms no part of the claimed design.
