Title: COMMUNICATION TIME REMINDERS BASED ON TEXT MESSAGES

Abstract: Communication time reminders based on text messages are described. A system identifies a future communication time from a text-based message transmitted by a mobile device. The system determines whether a current time is within a threshold time of the future communication time. The system provides a reminder of the text-based message to the mobile device and/or a recipient of the text-based message if the current time is within the threshold time of the future communication time.
