(54) Title: DEVICE AND METHOD FOR FOOD MANAGEMENT

(57) Abstract: A medical device is disclosed. The medical device includes an RFID reader for receiving information from at least one RFID transponder. The medical device also includes a memory for storing a database and at least one processor for processing information. Also, a remote controller for a medical device is disclosed. The remote controller includes an information receiver for receiving information related to food. The infusion device also includes a memory for storing a database and at least one processor for processing information. A method for use in a medical device is also disclosed. The method includes receiving information from an RFID transponder related to food. Also, the processing of the information by comparing the information to a database is included in the method. The method also includes determining the acceptability of the food and providing information related to acceptability to the
